DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 07/08/2004 has been considered by the Examiner. A copy of the 1449 initialed, dated and signed by the Examiner is included herewith.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has failed to provide units with respect to the JIS-B0601 units. Therefore, the scope of the claims cannot be ascertained and the claims are considered to be indefinite.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamikubo (JP 2003-211841; machine translation).

As an initial matter, the Examiner notes that a translation of this document is being obtained.

Kamikubo teaches a heat transfer image protective sheet comprising a substrate (support) and a protective layer formed thereon (abstract, for instance). The support may comprise PET with an adhesive layer and protective layer formed thereon (Detailed Description, pages 1-4, for instance). The protective sheet may be used to protect ink jet images (Detailed Description, page 2). The protective layer is applied thermally, as presently claimed.

Kamikubo teaches that the substrate surface has a surface roughness of 0.130 or more and a 60-degree specular gloss of less than 65%, as measured by JIS Z 8741 (abstract, for instance). Kamikubo fails to teach that the surface roughness is 0.2 to 0.5 (instant claim 1) or that the specular gloss is 10-30% (instant claim 2). However, where the prior discloses the general conditions of a claim, it is not inventive to discover optimum or workable ranges. In the present case, Kamikubo suggests the presently claimed specular gloss and surface roughness by

disclosing ranges that overlap those recited in the claims. Therefore, to discover optimum or workable ranges within those suggested by Kamikubo would have been prima facie obvious to one having ordinary skill in the art.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
